PRODUCT RANGE

Nimco Controls has over the years developed a wide range of motion control products and can today offer the market a broad product platform of Open Center and Load Sensing valves. These can be operated by any of our proportional control units which can be integrated into our CanBus based control system via the interactive EasyProg software. Thereby it is possible to take full control of all functions in the customer's machine, whether it is the stroke of a spool, the signal from a cylinder or the RPM of the diesel engine.

Flow capabilities range from
5 to 180 l/min (1 to 48 GPM)
with maximum pressure
up to 350 bar (5000 psi).

“PERFORMANCE THROUGH PRECISION CONTROLS”

For Nimco Controls performance is measured on how well we can make our customers machines perform in regards to Load Control, Optimized Energy Consumption and Machine Productivity.

Our knowledge in everything from Spool Design to Pressure Compensated Load Sensing Technology, Motion and Control Software Design, together with our ability to combine it all into an optimal solution for a specific machine is what will enable us to fulfil our customer's criteria for highest performance and productivity. We help you make more with less.

It is all about controlling the flow and the motion.

“GREEN SOLUTIONS FOR THE MOBILE INDUSTRY”

As the impact of climate change is getting more obvious for all of us it has become everybody's responsibility to work towards solutions that minimize the CO₂ foot print left behind for future generations.

At Nimco Controls our engineers are working towards finding solutions that offers our customers the highest output of energy while minimizing the energy consumed to do so.

We want a greener world.

“GLOBAL PRESENCE”

With Production facilities in Europe, North America and Asia do we service our worldwide customers with their product needs in all the corners of the world.

A wide net of authorized Nimco Controls stocking distributors add the availability of our products all over the world within 24 hours.

Global but local.
